📍 Location: Hyderabad, India

Professional Summary

Backend Engineer with 10+ years of experience building scalable, low-latency backend systems for financial and enterprise platforms. Specialized in distributed systems, event-driven architecture, microservices, and high-throughput transaction processing using Java and Spring Boot. Strong expertise in Kafka-based asynchronous systems, API performance optimization, resiliency patterns, and cloud-native deployments.

Work Experience

Advisory System Analyst

IBM

Hyderabad, India

Dec'21 - Present

- Engineered highly scalable backend systems using Spring Boot, integrating 5 external services and 3 databases, resulting in a 25% reduction in API response times.
- Improved data processing efficiency by 25% using Apache Kafka for real-time analytics, optimizing system performance.
- Increased user engagement by 30% through dynamic single-page applications (SPA) built with Angular.js, seamlessly integrating frontend and backend services.
- Leveraged Apache Kafka for real-time data processing and large-scale analysis, optimizing backend performance by 30% and enabling actionable insights.
- Deployed and managed microservice and full-stack applications on AWS cloud platforms, optimizing performance and scalability using services like EC2, S3, and Lambda.
- Led the design, development, and deployment of end-to-end solutions, achieving seamless integration between frontend and backend components and improving system efficiency by 20%.
- Designed and developed responsive web interfaces with HTML, CSS, JavaScript, and Vue.js, utilizing Bootstrap to ensure cross-browser compatibility and improve user experience by 25%.
- Led Agile sprints leveraging Agile Methodology, ensuring 100% on-time delivery of applications while achieving a 15% reduction in project defects.
- Built reusable TypeScript components, followed strict interface contracts, and reduced runtime errors by 30% with static typing.
- Worked on Angular.js for backend microservices, integrating REST APIs, authentication layers, and database logic.
- Delivered high-performance applications, boosting system scalability by 20% using advanced Java and AWS technologies.
- Deployed microservices using Docker and Kubernetes, achieving 99.9% uptime across all production environments.

Key Achievement: Increased product efficiency by 20% and achieved a 15% boost in user retention.

Sr. Analyst

Accenture

Hyderabad, India

Aug'20-Dec'21

- Architected a microservice architecture with Spring Boot, enhancing scalability and reducing latency by 25%.
- Implemented caching mechanisms, reducing database load by 30% and improving user retention by 15%.
- Automated CI/CD pipelines using Jenkins, increasing deployment frequency by 40% with zero downtime during releases.
- Implemented CI/CD pipelines to deploy infrastructure changes using Terraform Cloud and GitHub Actions.
- Ensured compliance and governance using Terraform's state management, remote backends, and workspace strategy.

- Designed and provisioned cloud infrastructure using Terraform to automate deployment of scalable and secure AWS environments.
- Created reusable Terraform modules for VPC, EC2, RDS, S3, IAM, and ECS configurations.
- Reduced database query execution times by 35% by optimizing interactions with Spring Data JPA.
- Managed Docker containers to ensure consistency across environments during microservice deployment
- Expanded secure and efficient RESTful APIs with Spring Boot, enabling seamless integration between modules and external systems, improving data exchange reliability by 30%.
- Enhanced user satisfaction by 20% through responsive web interfaces created with HTML, CSS, Bootstrap, and Vue.js.
- Deployed microservice on AWS infrastructure, utilizing EC2 and Elastic Load Balancing for high availability and resilience.
- Mentored 5 junior developers, resulting in a 25% improvement in code quality and adherence to standards.
- Pioneered Agile best practices, reducing sprint overruns by 10% and ensuring seamless cross-functional collaboration.
- Adhered to Agile methodology, actively participating in sprint planning, daily stand-ups, and retrospectives, improving team collaboration and on-time delivery by 20%.
- Improved module integration speed by 30% through secure RESTful APIs implemented with Spring Boot.

Key Achievement: Delivered a scalable microservice platform deployed across AWS, achieving high availability.

Java Consultant

Capgemini
Hyderabad, India

May'18-Jun'20

- Created scalable Java-based applications, reducing system downtime by 50% through optimized deployment pipelines.
- Boosted system communication by 20% with event-driven architectures utilizing AWS SNS and API Gateway.
- Monitored system performance with AWS CloudWatch, detecting and resolving 95% of anomalies before impacting users.
- Expanded robust RESTful APIs using AWS SNS and API Gateway, enabling 99.9% reliable data exchange between systems.
- Enhanced system interoperability by implementing secure RESTful APIs with Spring Boot, facilitating seamless integration of modules with external systems and improving data exchange efficiency by 30%.
- Architected and developed scalable Node.js APIs for real-time data exchange, utilizing Axios to boost efficiency and reduce response times by 25%.
- Streamlined infrastructure management with Terraform, cutting deployment times by 30%.
- Developed scalable Node.js APIs for real-time data exchange, leveraging Axios to improve data processing efficiency by 25% and reducing response times by 20%.
- Optimized performance and scalability by leveraging AWS services, including EMR for big data processing, S3 for efficient data storage, and AWS Lambda for serverless computing, reducing processing time by 30%.
- Implemented and managed data pipelines using AWS Data Pipeline and DynamoDB, enhancing data storage and retrieval efficiency by 35% and ensuring seamless data processing.

Key Achievement: Reduced deployment downtime by 50% while enhancing application uptime.

Java Trainee

Ajr Info systems pvt.ltd
Pune, India

Aug '15-Sep'17

- Improved and maintained backend infrastructure with Java and RESTful Web Services, improving system performance by 20% and ensuring high reliability.
- Optimized build processes by 15% through troubleshooting and transitioning from Ant to Maven for performance improvements.
- Resolved performance issues by troubleshooting, conducting code reviews, and debugging, while enhancing build efficiency by transitioning from Ant to Maven, reducing build times by 25%.
- Gained hands-on experience developing RESTful web services and microservices with Spring Boot, delivering scalable, robust solutions that enhanced system reliability by 25%.

Technologies and Languages

- **Programming Languages:** Java, Python
- **Frameworks:** RESTful Web Services, microservice, Spring (Spring Boot, Spring Cloud), JPA, Hibernate
- **Core Concepts:** Data structures and algorithms, RDBMS, Database Optimization, SQL, S.O.L.I.D. principles, TDD, J2SE, Design Patterns
- **Databases:** MySQL, PostgreSQL, DynamoDB, Cassandra, Azure cosmos DB
- **Cloud Computing & DevOps:** AWS, GCP, Docker, Jenkins, Terraform, Git, Kubernetes, Containerization, CI/CD, EC2, AWS Lambda, API Gateway, EKS, IAM, SQS, AWS S3, CloudWatch, ECS
- **Web Development:** HTML, CSS, JavaScript, Anuglar.js, HTML5, CSS3
- **Other skills:** Apache Kafka, Elasticsearch, Kibana, Apache Tomcat, XML, JSON, JUnit, Mockito, ETL, Jira, NoSQL

Education and Certifications

- **B. Tech Computer Engineering, JNTUK, AP, India** **2008 – 2012**
- Red Hat Certified Specialist in Containers
- IBM Certified Technical Advocate – Cloud V3
- **AWS Certified Cloud practitioner– CLF-C02**
- IBM Cloud for Financial Services

Soft Skills

- **Communication:** Clear and effective communication with cross-functional teams, stakeholders, and clients.
- **Team Collaboration:** Skilled in fostering collaboration and mentoring team members to achieve shared goals.
- **Problem-solving:** Strong analytical skills to troubleshoot and resolve complex technical issues efficiently.
- **Project Management:** Proficiency in Agile, Scrum methodologies, and tools like Confluence alongside Jira for better project documentation and tracking
- **Leadership:** Experience leading projects and guiding teams toward successful completion.
